Education

San Jose State University - San Jose, CA

Expected May 2026

B.S. in Computer Science, Math Minor

Relevant Coursework: Physically Based Modelling for Computer Graphics, Computer Architecture, Operating Systems, Data Structures & Algorithms, Information Security

Projects

Charon's Corner - San Jose, CA

Sep 2025 - Current

Technical Artist

- Developed a Blender Python tool that automatically validates model requirements (poly count, topology, naming conventions) to reduce asset review time.
- Created VFX using Unity Shader Graph and scripting for level transition.
- Wrote tool usage documentation for artists as well as internal codebase documentation.

Watercolor Post-Processing Shader - [GitHub](#)

Mar 2025 - May 2025

Personal Project

- Implemented a real-time watercolor stylization pipeline with GLSL based on, "Art-directed watercolor stylization of 3D animations in real-time".
- Features controls in various stages of the pipeline based on the geometry's vertex information, such as the level of color bleed, pigment turbulence, and edge darkening.

Educational Cybersecurity Game Research Project - [Dev Blog](#)

Aug 2024 - May 2025

Game Developer

- Designed gameplay mechanics, story and systems to test the effectiveness of games in internet safety education.
- Programmed a dialogue and cutscene manager to quickly build interactive characters and story events.

Draw - [Steam Page](#)

Nov 2022 - Nov 2023

Game Developer

- Developed a puzzle/visual-novel game with a team of 9 using Unity. Released on Steam with Windows and Mac support. Currently about 30,000 downloads.
- Wrote C# scripts for game systems, entity logic, and UI elements in Unity, as well as contributing to level and puzzle design.
- Created and integrated all sound effects and background ambiance for the game, edited using Adobe Audition.

Relevant Experience

SIGGRAPH 2025

Aug 2025

Student Volunteer

- Supported operations at premier computer graphics conference by assisting attendees, presentations, and event logistics.
- Learned from new research, workshops, and industry professionals across different aspects of computer graphics.
